

freshrain

Fall in love
with your hot tub again

Chemical-Free | Hassle-Free

Vapor Ion Plasma™
(VIP) Generator

“Without a doubt, we now use our hot tub more. It’s always fresh and inviting.”

— Tim Ruf

The freshrain system:

- Cleans your spa’s surfaces and water pipes
- De-emulsifies body oils, suntan oils and lotions
- Kills and filters harmful bacteria and viruses

How freshrain works chemical-free

Ever wonder why the air smells so good after a thunderstorm? The same ionization that occurs naturally in the air from lightning is safely re-created in the water of your spa.

The freshrain unit uses the patented Vapor Ion Plasma (VIP) Generator purification technology to create ionized oxygen bubbles, circulating through your spa. These negative ions act to naturally purify water while balancing the pH. Unlike other systems that use ozone, which dissipates rapidly and still requires the use of chemicals, freshrain continues to seek out and destroy pollutants around the clock.

“We didn’t use our hot tub because of the hassle factor. The freshrain system is hassle-free. We haven’t had to clean our hot tub since we installed freshrain. We just enjoy it.”

— Dr. Jim Libby

Remember what attracted you to your hot tub in the first place? Recreation. Relaxation. It wasn't the idea of spending valuable time and money on maintenance.

With freshrain, there’s:

- No more wiping and scrubbing
- No more scum on your tub and pipes
- No more draining and changing your tub water
- No more soaking in a chemical cocktail

What you don't want in your spa

Studies show that hot tubs are breeding grounds for bacteria. Spa owners traditionally fight this problem with chlorine.

“I’m not putting my kids in a chlorine bath. Freshrain absolutely delivers on its promise. I love having a hot tub now.”

— Dr. Shawn Johnston

While chlorine kills bacteria, it's a toxic chemical with risks that increase with repeated exposure. Chlorine is both inhaled and absorbed through the skin.

The freshrain enhanced water filtration system eliminates the need for harmful chlorine to keep your spa clean. Only freshrain removes chloroform, strep, staph, Norwalk, MRSA and all other harmful bacteria and viruses and keeps them from returning.

“The freshrain system is truly hassle-free. We haven’t had to clean our tub since we installed freshrain. Once you’ve tried freshrain, you’ll never let it go. It’s absolutely unbelievable.”

— Ken Fuller

Join the growing number of spa owners who've discovered the freshrain difference. And fall in love with your hot tub all over again.
